

CASE STUDY: Antonela Castillo - 14 years old

Todos Juntos

May 2015

First Treatment: 20/10/2014

Last Treatment: 27/5/2015

12 appointments

Antonela came to Sonrisa III in October 2014. She completed her treatments in May 2015 after eight months and 12 long sessions. Until that point, Antonela had had many infections and never smiled due to her terrible teeth. Her single mother had taken her to several local health centres who all turned her away saying to return when she was 16 years old.

She heard about Sonrisa III through word of mouth and had finally left with a full set of teeth and doesn't stop smiling now!
